Re: Dead Creek--Sauget, Cahokia and East St. Louis, Illinois, NPL Listing

I strongly support the listing of Areas 1 and 2 in Sauget, Cahokia and East St. Louis, Illinois, on the National Priorities List for cleanup **under the federal Superfund program**. The companies and parties responsible for the contamination **should pay** for the removal and cleanup.

Because of the sites' location next to the **Mississippi River**, I also urge EPA to remove all of the toxic and hazardous substances from out of the floodplain to a landfill permitted for hazardous waste. I believe leaving the waste on site **has the potential** for disaster in future flooding and rising groundwater levels. It would also **be a violation** of Executive Order 12866 on environmental justice.

If allowed to remain, the hazardous waste **could** contaminate the river, which is the source of drinking water for many and is already **listed by EPA** as impaired. It could pollute and poison fish, which is a major food supply for **many low-income families** as well as recreational fishermen. It will harm endangered and **threatened species** in the area and will further contaminate groundwater. In addition, **leaving the waste on site** would contribute to the degradation of the communities located in the floodplain.

If you do not move immediately to listing, **I request** an extension of time to file additional public comment because of the timing of the **announcement** in the Federal Register--September 13, two days after the World Trade Center bombing, **and the lack of general public notice** to the communities involved.

Thank you for your consideration of my **comments**.

Sincerely,

Signature Kathy Andria American Bottom

Re: Dead Creek--Sauget, Cahokia and East St. Louis, Illinois, NPL Listing

Dear Coordinator:

I am concerned for the health of my family and our community. We urge you to put Dead Creek Sites 1 and 2 on the National Priority List so that the hazardous and toxic waste in East St. Louis, Sauget and Cahokia will be cleaned up and removed from the floodplain. Those companies and individuals who are responsible for the contamination should be required to pay for the cleanup and removal.

Because we live in the floodplain, we frequently flood. We are concerned that leaving the toxic waste here could cause additional exposure to our families and contribute to the degradation of our communities. We also feel it is environmentally unjust and violates Executive Order 12866.

Many people eat fish caught from the Mississippi River and area creeks and lakes. EPA should not allow our food supply to be poisoned or our waters to be further contaminated.

Please list these sites and move quickly to remove the toxins from our communities.

Sincerely,

Signature

We urge you to put Dead Creek Sites 1 and 2 on the National Priority List **so that the hazardous and toxic waste in East St. Louis, Sauget and Cahokia will be cleaned up and removed from the floodplain**. Those companies and individuals who are responsible for the **contamination** should be required to pay for the cleanup and removal.

Because we live in the floodplain, we **frequently flood**. We are concerned that leaving the toxic waste here could cause additional **exposure to our families** and contribute to the degradation of our communities. We also feel it is **environmentally unjust** and violates Executive Order 12866.

Many people eat fish caught from the **Mississippi River** and area creeks and lakes. EPA should not allow our food supply to be poisoned **or our waters** to be further contaminated.

Please list these sites and move quickly to **remove the toxins** from our communities.

Sincerely,

Signature

Re: East St. Louis, Illinois and East St. Louis, Illinois, NPL Listing

As a parent, I am concerned for the health of my family and our community. We urge you to put Sites 1 and 2 on the NPL listing. We want to see that the hazardous and toxic waste in East St. Louis, Sauget and the Mississippi River is removed from the floodplain and that those companies and individuals responsible for the contamination will be required to pay for the cleanup and removal.

East St. Louis, Illinois, we frequently flood. We are concerned that leaving the toxic waste in the floodplain will expose to our families and contribute to the degradation of the Mississippi River. We feel it is environmentally unjust and violates Executive Order 12866.

We want to see the toxins removed from the Mississippi River and area creeks and lakes. EPA should not allow the Mississippi River to be poisoned or our water to be contaminated.

We need you to act quickly to remove the toxins from our communities.

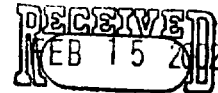

Sincerely,

50229/62205

Re: Dead Creek--Sauget, Cahokia and **East St. Louis**, Illinois, NPL Listing

I strongly support the listing of Areas **1 and 2** in Sauget, Cahokia and East St. Louis, Illinois, on the National Priorities List for cleanup **under the federal Superfund** program. The companies and parties responsible for the contamination **should** pay for the removal and cleanup.

Because of the sites' location next to the **Mississippi River**, I also urge EPA to remove all of the toxic and hazardous substances from out of **the floodplain** to a landfill permitted for hazardous waste. I believe leaving the waste on site **has the potential** for disaster in future flooding and rising groundwater levels. It would also **be a violation** of Executive Order 12866 on environmental justice.

If allowed to remain, the hazardous waste **could** contaminate the river, which is the source of drinking water for many and is already **listed by EPA** as impaired. It could pollute and poison fish, which is a major food supply for **many low-income** families as well as recreational fishermen. It will harm endangered and **threatened** species in the area and will further contaminate groundwater. In addition, **leaving the waste** on site would contribute to the degradation of the communities located **in the floodplain**.

If you do not move immediately to listing, **I request** an extension of time to file additional public comment because of the timing of the **announcement** in the Federal Register--September 13, two days after the World Trade Center bombing, **and the lack of general public notice** to the communities involved.

Thank you for your consideration of my **comments**.

I strongly support the listing of Areas 1 and 2 in Sauget, Cahokia and East St. Louis, Illinois, on the National Priorities List for cleanup under the federal Superfund program. The companies and parties responsible for the contamination **should** pay for the removal and cleanup.

Because of the sites' location next to the Mississippi River, I also urge EPA to remove all of the toxic and hazardous substances from out of the floodplain to a landfill permitted for hazardous waste. I believe leaving the waste on site **has** the potential for disaster in future flooding and rising groundwater levels. It would also be a violation of Executive Order 12866 on environmental justice.

If allowed to remain, the hazardous waste **could** contaminate the river, which is the source of drinking water for many and is already listed by EPA as impaired. It could pollute and poison fish, which is a major food supply for many low-income families as well as recreational fishermen. It will harm endangered and **threatened** species in the area and will further contaminate groundwater. In addition, **leaving** the waste on site would contribute to the degradation of the communities located in the floodplain.

If you do not move immediately to listing, I request an extension of time to file additional public comment because of the timing of the announcement in the Federal Register--September 13, two days after the World Trade Center bombing, and the lack of general public notice to the communities involved.

Thank you for your consideration of my comments.

Sincerely,

Signature GUSTAV A. L. Pritchett

Re: Dead Creek--Sauget, Cahokia and East St. Louis, Illinois, NPL Listing

Dear Coordinator:

I am concerned for the health of my family **and** our community. We urge you to put Dead Creek Sites 1 and 2 on the National Priority List **so that** the hazardous and toxic waste in East St. Louis, Sauget and Cahokia will be cleaned up **and removed** from the floodplain. Those companies and individuals who are responsible for the **contamination** should be required to pay for the cleanup and removal.

Because we live in the floodplain, we **frequently flood**. We are concerned that leaving the toxic waste here could cause additional exposure **to our families** and contribute to the degradation of our communities. We also feel it is **environmentally unjust** and violates Executive Order 12866.

Many people eat fish caught from the **Mississippi River** and area creeks and lakes. EPA should not allow our food supply to be poisoned **or our waters** to be further contaminated.

Please list these sites and move quickly to **remove** the toxins from our communities.

Sincerely,

Diane E. Adkins
